## How to Start

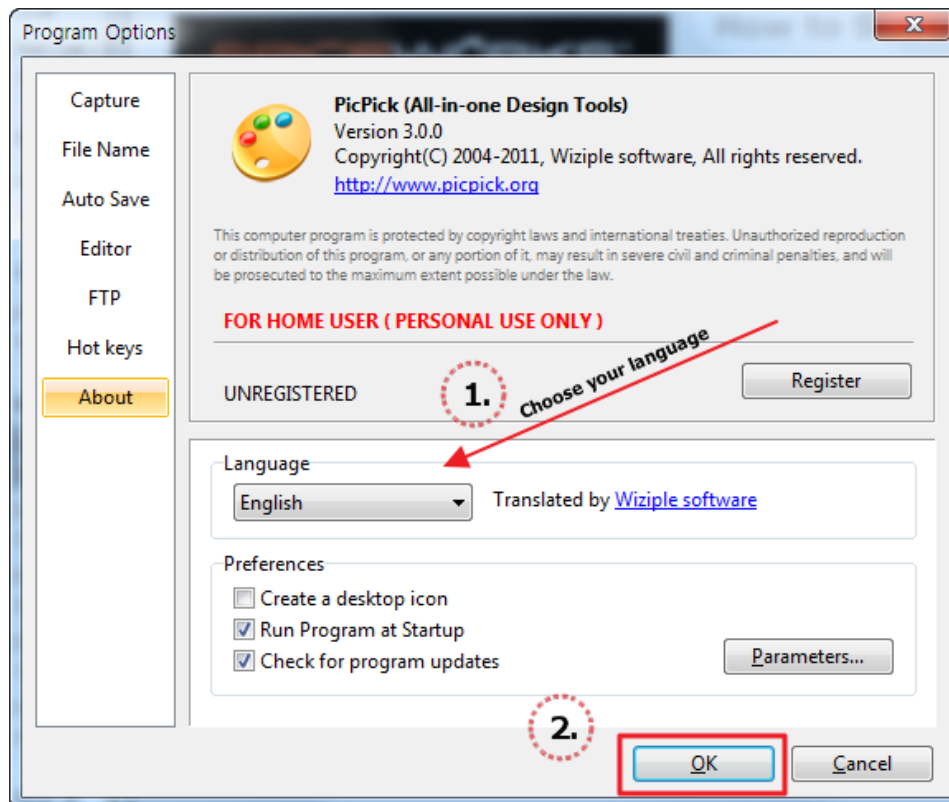

### [Step 1]

You can start PicPick using the PicPick icon in your START | Programs | PicPick menu.

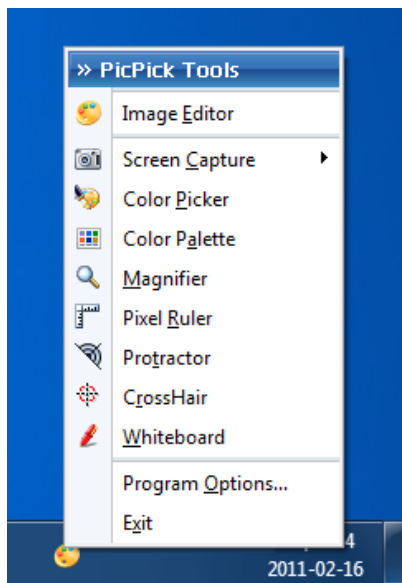

### [Step 2]

Once you start it, you will see this [Program options] window. This window is shown to the user only for the first time. Choose your language and press OK button.

### [Step 3]

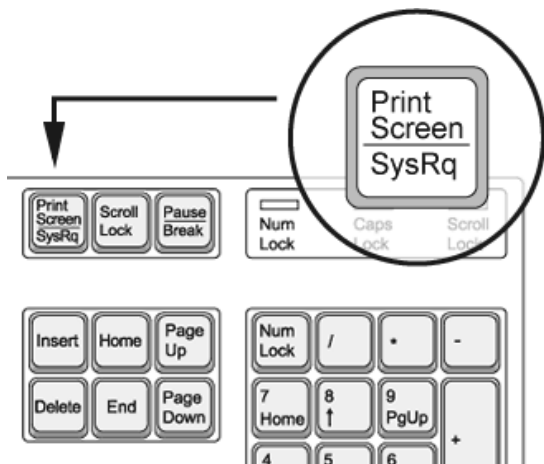

Now you can choose what you want to do. PicPick sits on the System Tray and waits for a call to action.

The best thing to do if you want to get to know a program is to use it.

First, Choose **Full-screen** in **Screen Capture** menu.

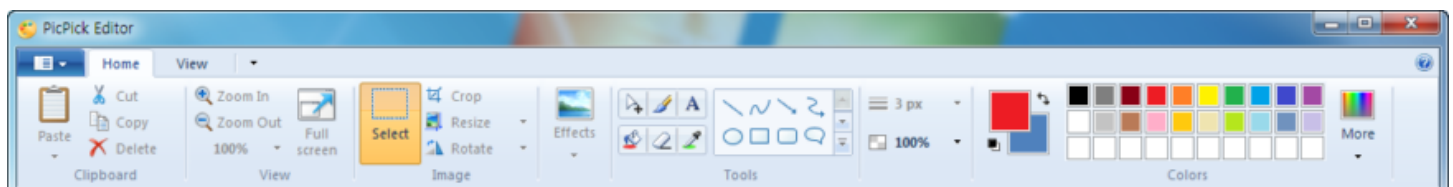

(or Press the print screen button on your keyboard)

#### [Step 4]

You will hear a clicking sound and immediately the PicPick Image editor will open up with a screenshot of the desktop. And right there you can start editing the picture if necessary and save it.

In the editor you will find 5 sections where the tools are located. From left to right you see Clipboard, View, Image, Tools and Colors.

- **Clipboard**

In the clipboard section you can cut, copy, paste and paste also from an image.

- **View**

The view section gives you the possibility to zoom in or out gradually or go full screen.

- **Image**

In the image section you can apply different effects (inverting, pixelating, blurring, etc.) to your picture. The rotation function goes clockwise or flips the image. And the resize function can be applied to the image or the canvas.

- **Tools**

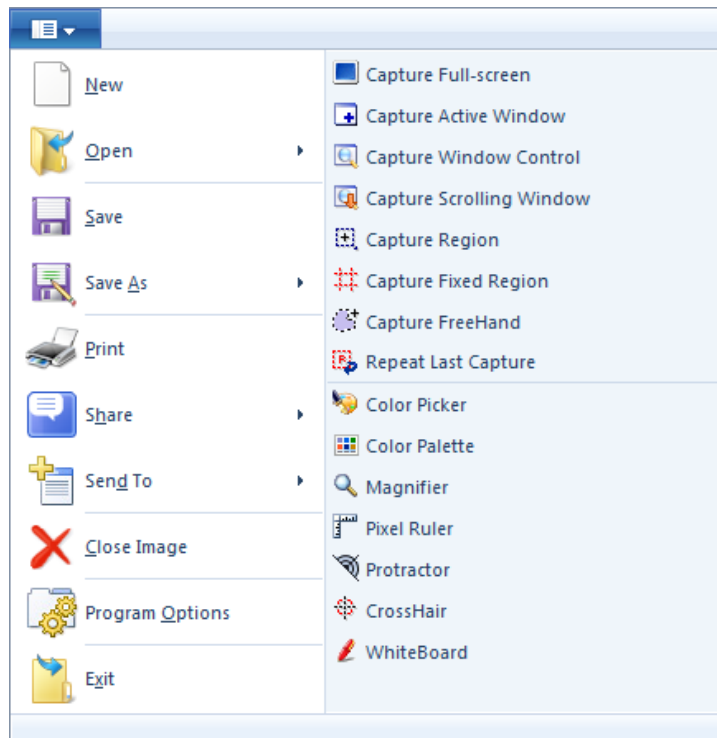

The tools section gives you access to different drawing shapes and options. You can change the opacity (in percentages) or thickness (in pixels) of the lines.

- **Colors**

In the color section is a color picker (pick any color on your screen) or choose from a palette of pastel or primary colors for your fore and/or background.

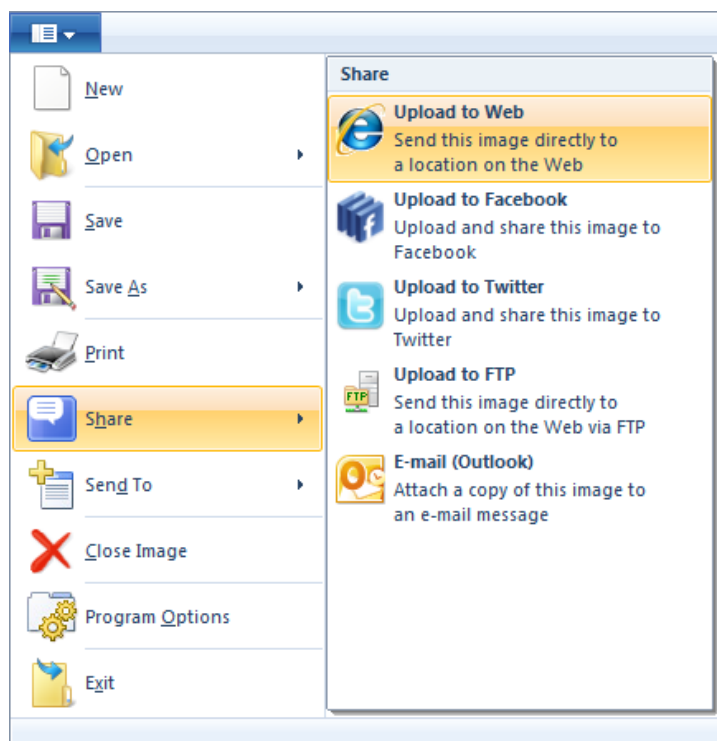

### [Step 5]

If you want to save the edited image, you can do so by clicking on the top left button  (Alt+F). A menu will open with the option to save it

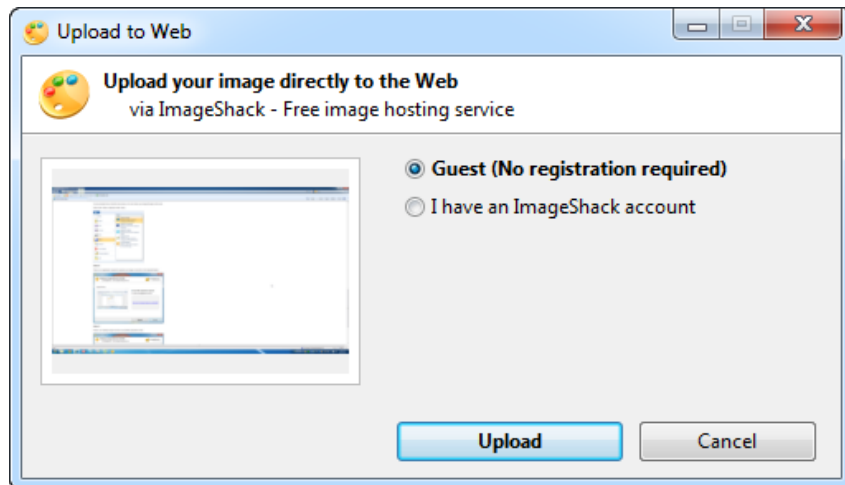

You may already know what the Save menu is. So Let's share your image through on the web.

Click on the "Share->Upload to Web" menu.

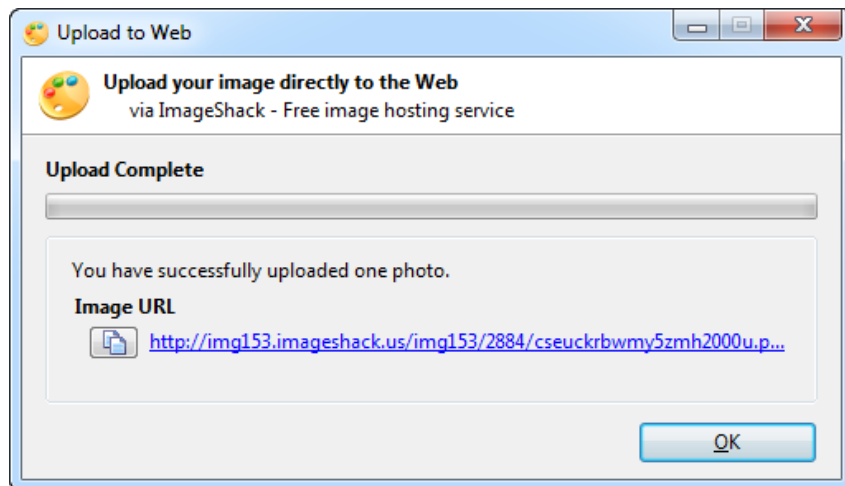

### [Step 6]

There is no registration required to upload your images. Just click on the [Upload] button.

#### [Step 7]

Finally, your desktop image has been successfully uploaded to Web.

You can copy the image URL by clicking  button. you can click on the link as well. With the URL, your friends or coworkers can view the image instantly in a web browser.
